DELPH-IN Summit 2021

19 July 2021

Mal-gram adaptations to the ERG

- Grammar in commercial use for 18 months in China

- Error codes implemented for 370 common error types

- More than a million student sentences analyzed

- Current use in middle schools and high schools

- Preparing for use by university students

Release of version 2020 of ERG

- Grammar stable for the past year

- Completed full Redwoods treebank update with FFTB

- Trained new parse ranking model with this treebank

- Prepared updated Linguistic Type Database, soon to be released

Exploring game-theoretic approach to applying ERG

- Experiments to improve Wikipedia search

- Discussions with Wikimedia and Elastic for enterprise search

- Developing prototype for spoken language control of appliances
